

Volume I

High Frequency Resonant, Quasi-Resonant, and Multi-Resonant Converters

Edited by
Dr. Fred C. Lee
Virginia Power Electronics Center

Contents

Forward	vi
About the Book	viii
Introduction: "High-Frequency Quasi-Resonant Converter Technologies," F.C. Lee (IEEE Proceedings June 1988)	3
Part 1: Zero Current Switching/Quasi-Resonant Converters	17
"Resonant Switches – A Unified Approach to Improved Performances of Switching Converters," K. H. Liu and F.C. Lee (International Telecommunications Energy Conference 1984; VPEC Seminar Proceedings 1984)	19
"Resonant Switches – Topologies and Characteristics," K.H. Liu, R. Oruganti, and F.C. Lee, (IEEE Power Electronics Specialists Conference 1984)	27
"Secondary-Side Resonance for High-Frequency Power Conversion," K.H. Liu and F.C. Lee, (IEEE Applied Power and Electronics Conference and Exposition 1986)	39
"State-Plane Analysis of Quasi-Resonant Converters," M.M. Jovanovic, K.W. Liu, R. Oruganti, and F.C. Lee, (International Telecommunications Energy Conference 1985)	47
"Variations of Quasi-Resonant DC-DC Converter Topologies," T. Zheng, D.Y. Chen, and F.C. Lee, (IEEE Power Electronics Specialists Conference 1987)	55
"Design Aspects for High-Frequency Off-Line Quasi-Resonant Converters," M.M. Jovanovic, D.C. Hopkins, and F.C. Lee, (High-Frequency Power Conversion Conference 1987)	67
"Stability Analysis of Push-Pull and Bridge-Type Zero-Current-Switched Quasi-Resonant Converters," M.M. Jovanovic and F.C. Lee, (IEEE Power Electronics Specialists Conference 1988)	83
"A Zero-Current-Switched Off-Line Quasi-Resonant Converter with Reduced Frequency Range," M.M. Jovanovic, F.C. Lee, and D.Y. Chen, (High Frequency Power Conversion Conference 1988; VPEC Seminar Proceedings 1988)	91
Part 2: Zero-Voltage Switching/Quasi-Resonant Converters	101
"Zero-Voltage Switching Techniques in DC/DC Converter Circuits," K.H. Liu and F.C. Lee, (IEEE Power Electronic Specialists Conference 1986)	103
"Zero-Voltage-Switched Quasi-Resonant Buck and Flyback Converters-Experimental Results at 10 MHZ," W.A. Tabisz, P. Gradzki, and F. C. Lee, (IEEE Power Electronics Specialists Conference 1987)	117
"Zero-Voltage Switching Technique in High-Frequency Off-Line Converters," M.M. Jovanovic, W.A. Tabisz, and F.C. Lee, (IEEE Applied Power and Electronics Conference and Exposition 1988)	127
Part 3: Quasi-Resonant Converters – Modeling and Control	137
"Generalized Resonant Switches, Part 1: Topologies," V. Vorperian, K.H. Liu, R. Tymerski, and F.C. Lee, (VPEC Seminar Proceedings 1986)	139

“Generalized Resonant Switches, Part 2: Analysis and Circuit Models,” V. Vorperian, K.H. Liu, R. Tymerski, and F.C. Lee, (VPEC Seminar Proceedings 1986).....	147
“Multi-Loop Control for Quasi-Resonant Converters,” R.B. Ridley, F. C. Lee, and V. Vorperian, (High Frequency Power Conversion Conference 1987)	155
“Multi-Loop Control for High-Frequency Quasi-Resonant Converters,” R.B. Ridley, W. A. Tabisz, and F. C. Lee, (High Frequency Power Conversion Conference 1988)	165
“Design and Control of a Full-Wave, Quasi-Resonant Flyback Converter,” R.B. Ridley, A. Lotfi, V. Vorperian, and F. C. Lee, (IEEE Applied Power and Electronics Conference and Exposition 1988).....	175
“Comparison of Stresses in Quasi-Resonant and Pulse-Width-Modulated Converters,” A. Lotfi, V. Vorperian, and F.C. Lee, (IEEE Power Electronics Specialists Conference 1988)	185
“Determination of Mosfet Switching Times in PWM, Zero-Current-Switched and Zero-Voltage-Switched Converters,” A.W. Lotfi, V. Vorperian, and F.C. Lee, (VPEC Seminar Proceedings 1988).....	193
Part 4: Zero-Voltage Switched/Multi-Resonant Converters	207
“Zero-Voltage-Switching Multi-Resonant Technique – A Novel Approach to Improve Performance of High Frequency Quasi-Resonant Converters,” W. A. Tabisz and F. C. Lee, (IEEE Power Electronics Specialists Conference 1988).....	209
“A Novel Zero-Voltage-Switched Multi-Resonant Forward Converter,” W.A. Tabisz and F.C. Lee, (High Frequency Power Conversion Conference 1988)	219
Part 5: Power Hybrid	229
“Two-Megahertz, Off-Line Hybridized Quai-Line Hybridized Converter,” D. C. Hopkins, M.M. Jovanovic, F.C. Lee, and F.W. Stephenson, (IEEE Applied Power and Electronics Conference and Exposition 1987)	231
“Off-Line ZCS-QRC Thick-Film Hybrid Circuit,” D.C. Hopkins, (VPEC Seminar 1988 and IEEE Applied Power and Electronics Conference 1987)	241
“Determination of Conductor Thickness and Width for Power Hybrid Circuits,” D.C. Hopkins, (VPEC Seminar 1988)	255
“Design of High Frequency Hybrid Power Transformers,” P.T. Gradzki and F. C. Lee, IEEE APEC 1988)	269
Part 6: Resonant Converters	269
“Resonant Power Processors, Part 1: State Plane Analysis,” R. Oruganti and F.C. Lee, (Industrial Applications and Society Annual Meeting; Industrial Applications Society Transactions, Nov/Dec 1985)	271
“Resonant Power Processors, Part 2: Methods of Control,” R. Oruganti and F. C. Lee, (Industrial Applications Society Annual Meeting; Industrial Applications Society Transactions, Nov/Dec 1985)	279
“Effects of Parasitic Losses on the Performance of Series Resonant Converters,” R. Oruganti and F.C. Lee, (Industrial Applications Society Annual Meeting, 1985)	291

“Implementation of Optimal Trajectory Control of Series Resonant Converters,” R. Oruganti, J. Yang, and F.C. Lee, (IEEE Power Electronics Specialist Conference and Exposition 1987	303
“Computer-Aided Design and Analysis of Series Resonant Converters,” J.T. Yang and F.C. Lee, (Industrial Applications Society Annual Meeting 1987)	313
“State-Plane Analysis of Parallel Resonant Converters,” R. Oruganti and F.C. Lee, (IEEE Power Electronics Specialists Conference and Exposition 1985)	319
“High-Q Approximate Small-Signal Analysis of Resonant Converters,” V. Vorperian, (IEEE Power Electronics Specialist Conference and Exposition 1985; VPEC Seminar 1984).....	337
“A Novel Control for Bidirectional Power Flow of a Parallel Resonant Converter,” F. S. Tsai, R. Oruganti, and F.C. Lee, (Industrial Applications Society Annual Meeting 1985; VPEC Seminar Proceedings 1985)	347
Part 7: Constant-Frequency Resonant Converters	353
“Constant-Frequency Phase Controlled Resonant Power Processor,” F.S. Tsai and F. C. Lee, (Industrial Applications Annual Meeting 1986).....	355
“Constant-Frequency, Clamped-Mode Resonant Converters,” F.S. Tsai, P. Materu, and F. C. Lee, (IEEE Power Electronics Specialists Conference and Exposition 1987 and VPEC Seminar 1987)	361
“State-Plane Analysis of Clamped –Mode Parallel-Resonant Converters,” F.S. Tsai, Y. Chin and F. C. Lee, (International Telecommunications Energy Conference 1987)	371
“Constant-Frequency Parallel-Resonant Converters,” Y. Chin and F.C. Lee, (IEEE Industrial Applications Society Annual Meeting 1987	379
“A Complete DC Characterization of a Constant-Frequency, Clamped-Mode, Series-Resonant Converter,” F.S. Tsai and F.C. Lee, (VPEC Seminar 1988 and IEEE Power Electronics Specialists Conference 1988)	385
“Off-Line Application of the Fixed-Frequency, Clamped-Mode, Series-Resonant Converter,” J.A. Sabate and F.C. Lee, (VPEC Seminar 1988)	395
Part 8: Space Station/Platform Power Systems	403
“High-Frequency AC Power Distribution in Space Stations,” F.S. Tsai and F.C. Lee, (International Workshop on Control Systems in New Energy Applications 1987).....	405
“Effects of Load on the Performance of the Mapham Resonant Inverter,” F.S. Tsai and F.C. Lee, (VPEC Seminar 1988)	419
“Comparative Study of Constant-Frequency Resonant Inverter Topologies for AC Power Distribution,” S. Kim and F.C. Lee, (VPEC Seminar 1988)	427
Author Index	439
Editor’s Biography.....	440
